

Central Park Coffee Table

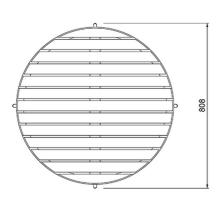

The Central Park Coffee Table pairs perfectly with the Central Park Lounge chair creating a comfortable and functional setting.

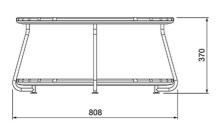

The design maintains its clean and simple lines and creates a point of interest with its angled stanless steel legs that overlap the lower platform leaving you to decide whether it is the same size as the upper platform.

Constructed from a Stainless Steel frame with Teak wood tabletops the Central Park coffee table is perfect for outdoor conditions.

The Central Park Coffee Table is manufactured in Indonesia from sustainably sourced, legally harvested, and traceable wood sources.
