### Tree Ring Birdhouse

The Tree Ring Birdhouse is a fun and decorative design that also provides a very useful shelter for small birds.

The shape mimics the rings found on the knots of trees with the intention of making the bird feel more at home. The egg shape creates a comfortable space that drains water away and is a quirky reminder of the bird's very first home.

Constructed of natural teak wood, the Tree Ring birdhouse is designed to fit discreetly into a natural habitat or it can be proudly displayed for all to see. The hole is large enough for smaller birds to enter but small enough to keep predators out.

The Tree Ring Birdhouses are manufactured in Indonesia from sustainably sourced, legally harvested, and traceable wood sources.
